FAS USER MANUAL

FAS DATA AVAILABLE ON IBIS

Now available on IBIS is FAS asset information as is entered on FAS data entry screens (property number, quantity, description, class code, location, dollar amounts, funding sources, and more), as well as filters for disposed assets and assets over \$5,000. There is also a separate category for the FAS Hold File which contains information from the previous night of automated FAS system processing. You can build your own customized reports and save them in PDF or MS Excel formats. [Click here for more information about IBIS.](#)

Figure 1 - FAS on IBIS

In Query or Report Studio, FAS and FAS Hold File will be displayed in the left Menu. Place the cursor over a query item in the menu, and a description will be displayed.

IBIS (Idaho Business Intelligence Solution) is a robust reporting application allowing state agencies to have secure, organized access to FAS and STARS data. For more information contact the Division of Statewide Accounting Customer Support at dsahelpline @sco.idaho.gov or (208) 332-8827.
