

WELCOME TO

Luma

Luma is a statewide modernization effort that will combine Budget, Finance, Procurement, Human Resources, and Payroll functionality into one Enterprise Resource System (ERP). This modernization effort will transform the way the State of Idaho does business, improve transparency, and provide a core foundation for the future.

Create a Customer: What's Changing?

Impacts

Who:

- Contract Managers
- Buyers
- Logistic Supervisors
- Inventory Specialists
- Receivers
- Purchasing Supervisors

What:

- IPRO and Navision will be replaced by Luma.
- Any other agency 3rd party system or spreadsheet used to track the procurement of goods and services will also be replaced.

When:

The Procurement module will go live on July 1, 2021.

What differences can I expect?

Bill-to Address

Luma will allow agencies to create different addresses for billing. Specified addresses allows agencies with internal departments across the state to bill to each specific location.

Contract Visibility

Luma will provide users the ability to view contract information on an item master list for both agency staff and vendors.

Integrated Management Tools

Business operations such as contract management, vendor monitoring, Purchase Order monitoring, and receiving receipts will be completed in the same system. Integration will create workload efficiency for users as they no longer have to pull information from different sources.

Automation

Luma will eliminate the need to manage contract awards in spreadsheets. Users can view the information they need from a centralized location.
