

WELCOME TO

Luma

Brad Swann

Luma is a statewide modernization effort that will combine Budget, Finance, Procurement, Human Resources, and Payroll functionality into one Enterprise Resource System (ERP). This modernization effort will transform the way the State of Idaho does business, improve transparency, and provide a core foundation for the future.

Awards: What's Changing?

Impacts

Who:

- Receivers
- Inventory Managers
- Purchasing Supervisors

What:

- IPRO and Navision will be replaced by Luma.
- Any other agency 3rd party system or spreadsheet used to track inventory will also be replaced.

When:

The Procurement module will go live on July 1, 2021.

What differences can I expect?

Delivery Monitoring

Purchasing Supervisors will easily be able to monitor and report on delivery performance while providing vendor evaluations that can be viewed statewide.

Closing Purchase Orders

Luma will automatically close purchase order lines for receipts and vendor invoices.

Spending Reports

Purchasing Supervisors will have easy access to spending data and the ability to filter and view this data in dashboards. Increased visibility through dashboards can increase efficiency for users by reducing the delay caused by running a detailed report.

Vendor Evaluations

Luma will provide the ability to conduct evaluations of vendor and delivery performance. Agencies will be able to review information about a vendor prior to contracting for goods and services, including negotiated terms. This allows them to make evidence based decisions.
